

Frontend Engineering

Level: Beginner to Advanced • Category: Software Engineering • Mentored by Industry Faculty

PROGRAM OVERVIEW

CURRICULUM & LEARNING MODULES

1 Foundations & Core Principles

Introduction to foundational theories, tooling setup, industry standards, and professional best practices.

2 Intermediate Practical Architectures

Hands-on implementation of enterprise architectures, workflows, debugging, and systematic optimization.

3 Advanced Specialization & Security

Deep dive into production-grade systems, resilience, security hygiene, and real-time operational troubleshooting.

4 Capstone Project & Portfolio Defense

Comprehensive real-world project delivery, code and architecture review, mentorship evaluation, and portfolio showcase.

PREREQUISITES & REQUIREMENTS

- A functioning laptop with minimum 8GB RAM and stable internet connectivity.
- Commitment to live interactive sessions, lab hours, and weekly practical assignments.
- Passion for hands-on problem solving and readiness to work collaboratively.
